SKILLS

Programming: JavaScript, Python, C++, C

Frontend Development: HTML/CSS, JavaScript, AJAX, REACT, SCSS, Tailwind CSS

Other tools: Git, GitHub, Axios, Framer Motion, Redux, Figma, Sanity CMS, Webpack, Vite

PROJECTS

Personal Portfolio | React, Sanity CMS, SCSS, Framer Motion   **See Project**

Personal Portfolio website using React as the frontend and sanity CMS as a backend.

- Developed a personal portfolio website to showcase my web development tools and technologies skills.
- Used REACT, SANITY CMS, SCSS, FRAMER MOTION to make it more seamless.

Reelscape | HTML, CSS, Vanilla JavaScript, TAILWIND CSS   **See Project**

A movie guide website made using HTML, CSS, Vanilla JavaScript and Tailwind CSS.

- Used the movie database public API (TMDB) to fetch the data and display it dynamically with a beautiful UI.

Redux Project | React, Vite, Tailwind CSS, Redux, Redux Toolkit, Async Thunk, API handling.   **See project**

Cart project showcasing the use of Redux for state management in a React application.

- Created a simple redux project for state management and async data fetching using Async Thunk.

Countdown Timer |HTML, CSS, JavaScript   **See Project**

Countdown app using simple yet tricky flip clock animation effect in CSS.

- Developed a countdown/launch time app from one of the frontend mentor challenges websites.

Shades and Tints Generator |React, values.js, API Handling   **See Project**

HEX value-based color generator

- Created a React app that uses value.js library to generate different colors based on their HEX values.

Splitter |React, React Hooks   **See project**

Bill Splitter App

- Created a React app modelled with the ability to allow users to split a bill among a group of people.

Quote Generator |React, AJAX, API Handling   **See project**

Quote Generator App

- Created a quote generator app using React that fetches quotes from the type.fit API.

Accordion | HTML, CSS   **See project**

Accordion Component with frequently asked questions

- Created using HTML and CSS only without using JavaScript, solely relying on CSS.

Food Website | HTML, CSS, React   **See project**

Modern Food Website created using react

- Designed a modern restaurant website to ensure the optimal viewing experience on different devices.
